Front Desk Mode Disabled

On-Demand Visits

Visit enters the waiting room. Any clinician toggled on receives a message that a patient has arrived in the waiting room. The Clinician then picks the patient up from the waiting room to start visit

1. For an on demand visit to be available...
 - a. A clinician must be **toggled available**

- b. The practice hours must be set to **active**

2. Once a patient has requested a visit, all clinicians toggled available will receive a notification.

Scheduled Visits

Scheduled visit's are routed directly to the provider you are scheduled with

1. The clinician will receive a notification even if they are not toggled available

2. On-Demand hours **do not** need to be set to active
