

Using the Live Interpreter Feature for an In-Office Visit

Last Modified on 06/29/2021 1:07 pm EDT

Using a live interpreter for an in-office visit

- Go to portal.anytimepediatrics.com and [register](#) as a new patient.
 - We recommend adding the patient with the name Test Account so there will not be any confusion with your practice.
 - Once this patient account is registered, you will be able to use this account for in-office interpreter visits.
- Add your [practice code](#) to link your test account to your office.
- Have the Test Account join the waiting room by sending an [instant invite](#).
- Once the Test Account is in your waiting room, have the Clinician begin the telemedicine visit.
- The Clinician will be able to [bring the live interpreter](#) on the line so they can provide language services to your patient who is in the office.
